

**WEST SADBURY TOWNSHIP
BOARD OF SUPERVISORS WORK SESSION (Continued)
October 1, 2018**

Attending: Barry Edwards, Ed Haas, John Keeseey, Joe Prekup, Michael Goodman (TPD) and Chris Lincoln (TPD)

At 1:00 p.m., the Board and Roadmaster Joe Prekup met with Michael Goodman and Chris Lincoln of TPD to discuss roadway conditions throughout the Township. Chris Lincoln referenced a Township road inventory review done by TPD in 2013. Mr. Goodman informed the Board that he had driven throughout the Township recently to look at the current conditions of the roads. Among other things, he noted that water gathers at the edges of several roads and does not get to cross pipes. He recommended that the edges be graded to allow water to drain away from the roads. There was also discussion about various road maintenance treatments, such as oil and chip coating. A recommendation was also made to build a spreadsheet for a road inventory to track road conditions, ongoing maintenance, etc.

It was decided that Joe and Mike Goodman will schedule a day next week to evaluate the roads. The results will be used to create a road maintenance program with the help of TPD.

As there was no further business before the Board, at 1:54 p.m., the meeting was adjourned.

Respectfully submitted,

Cindy Mammarella
